This is a classic book on a fascinating subject. Peter Trudgill examines the close link between language and society and the many factors that influence the way we speak. These range from gender, environment, age, race, class, region and politics. Trudgill's book surveys languages and societies from all over the world drawing on examples from Afrikaans to Yiddish. He has added a fascinating chapter on the development of a language as a result of a non-native speaker's use of it. Compelling and authoritative, this new edition of a bestselling book is set to redraw the boundaries of the study of sociolinguistics.

This unique work analyzes the crisis in modern society, building on the ideas of the Frankfurt School thinkers. Emphasizing social evolution and learning processes, it argues that crisis is mediated by social class conflicts and collective learning, the results of which are embodied in constitutional and public law. First, the work outlines a new categorical framework of critical theory in which it is conceived as a theory of crisis. It shows that the Marxist focus on economy and on class struggle is too narrow to deal with the range of social conflicts within modern society, and posits that a crisis of legitimization is at the core of all crises. It then discusses the dialectic of revolutionary and evolutionary developmental processes of modern society and its legal system. This volume in the Critical Theory and Contemporary Society by a leading scholar in the field provides a new approach to critical theory that will appeal to anyone studying political sociology, political theory, and law.

Why have 1500 separate languages developed in the Pacific region? Why do Danes understand Norwegians better than Norwegians understand Danish? Is Ebonics a language or a dialect? Linguistics tends to ignore the relationship between languages and the societies in which they are spoken, while sociology generally overlooks the role of language in the constitution of society. In this book Suzanne Romaine provides a clear, lively, and accessible introduction to the field of sociolinguistics and emphasizes the constant interaction between society and language, discussing both traditional and recent issues including: language and social class, language and gender, language and education, and pidgins and creoles. The text shows how our linguistic choices are motivated by social factors, and how certain ways of speaking come to be vested with symbolic value and includes examples drawing on studies of cultures and languages all over the world. This new edition incorporates new material on current issues in the study of gender as well as other topics such as the linguistic dimension to the ethnic conflict in the Balkans, and the controversy over Ebonics in the United States.
