Approximation and
Rounding. Probability is
the science of how likely
events are to happen. At
its simplest, it 's
concerned with the roll
of a dice, or the fall of the
cards in a game. But
probability is also vital to
science and life more
generally.

explain probability is using division, where the number of desirable outcomes is divided by the number of all possible outcomes—number of desirable outcomes over the number of all possible outcomes. For example: I have a little paper cup here and it has different colored houses—blue ones, red ones.
