This volume is a collection of studies on various aspects of word order variation in Turkish. As a head-final, left-branching 'free' word order language, Turkish raises a number of significant theory-internal as well as language-particular questions regarding

theory of linearization in general. Turkish is a configurational language. It licenses constructions in which constituents can occur in non-canonical presubject as well as postverbal positions. Presented within the assumptions of the generative tradition, the discussion and

Analyses of the various aspects of the linearization facts of the language offer a novel treatment of the issues therein. The authors approach the word order phenomena from a variety of perspectives, ranging from purely syntactic treatments, to accounts as syntax-

This volume brings together a number of researchers working on non-cartographic conceptions of word order, movement and/or phrase structure. The

proposals made in this book discuss both problems for standard cartographic theory as well as alternatives.

As such, this book is the first to present a varied and in-depth overview of the position taken by a substantial number of researchers in the field today on what is presumably one of the

most hotly debated and controversial issues in present-day generative grammar.

This book considers the recent results and evaluations of the Theta System in both theoretical and experimental domains.

A Grammar of
Mongsen Ao, the
result of the author's
fieldwork over a ten-
year period, presents
the first
comprehensive
grammatical
description of a
language spoken in
Nagaland, north-east
India. The languages
of this region remain

Download File

PDF Ap

Underdocumented for a number of historical reasons. During the nineteenth and early twentieth centuries, the widespread cultural practice of head-hunting discouraged outsiders from entering the Naga Hills. Shortly after Indian independence in 1947, an armed

Download File

PDF Ap

rebellion by Naga separatists and a government policy of restricting access to the troubled area ensured that Nagaland remained a difficult place to conduct research. In this context, A Grammar of Mongsen Ao offers valuable new insights into the structure of a Tibeto-

Download File PDF Ap

Burman language spoken in a linguistically little-known region of the world. The grammatical analysis documents all the functional domains of the language and includes four glossed and translated texts, the latter being of interest to anthropologists

studying folklore.

Mongsen Ao is a highly agglutinating, mostly suffixing language with predominantly dependent-marking characteristics. Its grammar demonstrates a number of typologically interesting features that are described in

Download File

PDF Ap

detail in the book.

Among these is an unusual case marking system in which grammatical marking is motivated by semantic and pragmatic factors, and a rich verbal morphology that produces elaborate sequences of agglutinative suffixes.

Grammaticalisation

processes are also discussed where relevant, thereby extending the appeal of the book to linguists with interests in grammaticalisation theory. This book will be of value to any linguist seeking to clarify genetic relationships within the Tibeto-Burman family, and it will

serve more broadly as
a reference grammar
for typologists
interested in the
typological features of
a Tibeto-Burman
language of north-
east India.
