Apple cider vinegar, or cider vinegar, is a vinegar made from fermented apple juice, and used in salad dressings, marinades, vinaigrettes, food preservatives, and chutneys. It is made by crushing apples, then squeezing out the juice. Bacteria and yeast are added to the liquid to start the alcoholic fermentation process, which converts the sugars to alcohol. In a second fermentation step, the alcohol is converted into vinegar by acetic acid-forming bacteria. Acetic acid and malic acid combine to

Apple cider vinegar - Wikipedia

Apple cider is the name used in the United States and Canada for an unfiltered, unsweetened, non-alcoholic beverage made from apples. Though typically referred to simply as "cider" in the United States, it is not to be confused with the alcoholic beverage known as cider in other places, which is called "hard cider" in the US. It is the liquid extracted from an apple and all its components, that is then boiled to concentration. The liquid can be extracted from the apple itself, the apple core, th

Apple cider - Wikipedia

From Wikipedia, the free encyclopedia Honeygar, also Honegar, is a mix of honey and apple cider vinegar, similar to switchel. Honey and vinegar mixtures such as oxymel have been used for purported health benefits since ancient times.

Honeygar - Wikipedia

The 'Spartan' is an apple cultivar developed by Dr. R. C Palmer and introduced in 1936 from the Federal Agriculture Research Station in Summerland, British Columbia, now known as the Pacific Agri-Food Research Centre - Summerland. The 'Spartan' is notable for being the first new breed of apple produced from a formal scientific breeding program. The apple was supposed to be a cross between two ...

Spartan (apple) - Wikipedia

Apple cider vinegar is created by fermenting regular apple cider. Bacteria work to break down the sugars and yeast. It transforms the broken-down sugars and yeast first into alcohol and then into vinegar. Many people regularly use apple cider vinegar in cooking without ever stopping to consider the health benefits of this liquid.

Apple Cider Vinegar Benefits & Information

Apple cider vinegar is made by fermenting the sugars from apples which turns them into acetic acid – the active ingredient in vinegar. In the shops you may see apple cider vinegar labelled as 'filtered' (a clear liquid), or unfiltered – the latter containing something known as 'mother'. This means there are proteins, enzymes and friendly bacteria present, and gives this type of vinegar a cloudy appearance.

The health benefits of apple cider vinegar - BBC Good Food

Apple cider vinegar is made by fermenting the sugar from apples. This turns them into acetic acid, which is a main active ingredient in vinegar and may be responsible for its health benefits. 2....
