We were asked to announce an upcoming new handbook, which should hit the bookstore shelves in early 2015. It is the "Applied Superconductivity: Handbook on Devices and Applications" edited by Paul Seidel of the university of Jena, an ambitious attempt to cover the whole broad field. Indeed, the very long list of co-authors on Contents pages may remind one of "Who's Who in Applied Superconductivity", which at least promises competent, up-to-date coverage of that whole field.
