Based on survey data from users who are members in user groups of the management software firm Computer Associates, Celine Schulz examines how groups of users can be organised and leveraged by firms for their innovation processes.

DB2 Developer's Guide is the field's #1 go-to source for on-the-job information on programming and administering DB2 on IBM z/OS mainframes. Now, three-time IBM Information Champion Craig S. Mullins has

thoroughly updated this classic for DB2 v9 and v10. Mullins fully covers new DB2 innovations including temporal database support; hashing; universal tablespaces; pureXML; performance, security and governance improvements; new data types, and much more. Using current versions of DB2 for z/OS, readers will learn how to:

- \* Build better databases and applications for CICS, IMS, batch, CAF, and RRSAF
- \* Write proficient, code-optimized DB2 SQL
- \* Implement efficient dynamic and static SQL applications
- \* Use binding and rebinding to optimize applications
- \* Efficiently create, administer, and manage DB2 databases and applications
- \* Design, build, and populate efficient DB2 database structures for online, batch, and data warehousing
- \* Improve the performance of DB2 subsystems, databases, utilities, programs, and SQL

stat DB2 Developer's Guide, Sixth Edition builds on the unique approach that has made previous editions so valuable. It combines:

- \* Condensed, easy-to-read coverage of all essential topics: information otherwise scattered through dozens of documents
- \* Detailed discussions of crucial details within each topic
- \* Expert, field-tested implementation advice
- \* Sensible examples

Developing B2B Social Communities: Keys to Growth, Innovation, and Customer Loyalty explains why business-to-business companies need a robust online community strategy to survive and flourish in today's changing economy and shows you how to design and execute your company's strategy successfully. Seminars, publications, market research, and customer care centers remain important tools in every B2B firm's toolbox for understanding, attracting, and serving customers while keeping them loyal. But in a world of fierce global price competition, increasing transparency of business practices, and ever-rising complexity, these traditional customer interaction channels are no longer enough for most B2B companies. That's why smart organizations—both large and small—are tapping into online communities to gain a huge competitive advantage: the ability to get much closer to customers and become more valuable to them. Developing B2B Social Communities delves into the generators of business value in online communities: immediate customer access to expert information within the company and from other customers; inexpensive delivery of custom technical help; demonstrations of how customers can get the most from their products; and forums where customers can share tips, air gripes, reveal unmet needs, and suggest improvements. Three veteran community managers show you how to harness the knowledge of the crowd to help shape your company's strategic direction, develop new products and services, identify trends, sell more, serve customers more efficiently, and provide better product support. Fleshing out precepts with real-world examples and case studies, the authors detail the transformational opportunities—and pitfalls—for creating online communities.

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.
