President Barack Obama signed the Cybersecurity Information Sharing Act of 2015 (CISA) into law on December 18, 2015, as Division N of the Consolidated Appropriations Act of 2016. While there are four cyber components to Division N, CISA arguably has some of the most far-reaching implications as it authorizes cybersecurity information sharing between and among the private sector; state, local, tribal, and territorial governments; and the Federal Government.

~~Cybersecurity Information Sharing Act of 2015~~

The Cybersecurity Information Sharing Act of 2015 (“CISA”) was signed into law on December 18, 2015. The law has two main components. First, it authorizes companies to monitor and implement defensive measures on their own information systems to counter cyber threats.

~~2015 SSP Fact Sheet | CISA~~

The Cybersecurity Information Sharing Act is a United States federal law designed to "improve cybersecurity in the United States through enhanced sharing of information about cybersecurity threats, and for other purposes". The law allows the sharing of Internet traffic information between the U.S. government and technology and manufacturing companies. The bill was introduced in the U.S. Senate on July 10, 2014, and passed in the Senate October 27, 2015. Opponents question CISA's value, believing
