Examining Russia–EU relations in terms of the forms and types of power tools they use, this book argues that the deteriorating relations between Russia and the

Game  
EU lie in the deep differences in their preferences for the international status quo. These different approaches, combined with economic interdependence and geographic proximity, means both parties experience significant difficulties in shaping

strategy and formulating agendas with regards to each other. The Russian leadership is well aware of the EU's "authority orientation" but fails to reliably predict foreign policy at the EU level, whilst the EU realizes Russia's "coercive orientation" in general, but

cannot predict when and where coercive tools will be used next. Russia is gradually realizing the importance of authority, while the EU sees the necessity of coercion tools for coping with certain challenges. The learning process is ongoing but the basic

History is a powerful tool in the

This book is designed to present a
