An insightful memoir from a figure skating champion about her life as a bisexual professional athlete, perfect for readers of *Fierce* by Aly Raisman and *Forward* by Abby Wambach. Karina Manta has had a busy few years: Not only did she capture the hearts of many with her fan-favorite performance at the U.S. Figure Skating Championships, she also became the first female figure skater on Team USA to come out as queer. Her *Modern Love* essay "I Can't Hate My Body if I Love Hers" was published in the *New York Times*, and then she joined the circus--Cirque du Soleil's on-ice show, AXEL. Karina's memoir covers these experiences and much more. Attending a high school with 4,000 students, you'd expect to know more than two openly gay students, but Karina didn't meet an out-lesbian until she was nearly seventeen--let alone any other kind of queer woman. But this isn't just a story about her queerness. It's also a story about her struggle with body image in a sport that prizes delicate femininity. It's a story about panic attacks, and first crushes, and all the crushes that followed, and it's a story about growing up, feeling different than everybody around her and then realizing that everyone else felt different too.

American gymnast Shawn Johnson is a four-time Olympic gold and silver medalist; a national--and world--champion athlete and a winner on the popular "Dancing with the Stars." This is the amazing true journey of how this young Olympian has found balance in her life.

Managing Major Sports Events: Theory and Practice is a complete introduction to the principles and practical skills that underpin the running and hosting of major sports events, from initial bid to post-event legacy and sustainability. Now in a fully-revised and updated new edition, the book draws on the latest research from across multiple disciplines; explores real-world situations, and emphasises practical problem-solving skills. It covers every key area in the event management process, including: • Bidding, leadership, and planning • Marketing and human resource management • Venues and ceremonies • Communications and technology (including social media) • Functional area considerations (including sport, protocol, and event services) • Security and risk management • Games-time considerations • Event wrap-up and evaluation • Legacy and sustainability This revised edition includes expanded coverage of cutting-edge topics such as digital media, culture, human resources, the volunteer workforce, readiness, security, and managing Games-time. Each chapter combines theory, practical decision-making exercises and case studies of major sports events from around the world, helping students and practitioners alike to understand and prepare for the reality of executing major events on an international scale. Also new to this edition is an 'Outlook, Trends and Innovations' section in each chapter, plus 'tips' by leading events professionals. *Managing Major Sports Events: Theory and Practice* is an essential textbook for any course on sports event management or international sports management, and an invaluable resource for all sport management researchers, practitioners and policy-makers. Online resources include PowerPoint slides, multiple choice questions, essay questions and decision-making exercises.

Sir Thomas Lewis has become one of the greatest cardiologists of this century. He was foremost in using the newly invented electrocardiograph to diagnose heart disease and was a pioneer of cardiac electro-physiology. This is the first biography of Sir Thomas Lewis, who became famous, whilst still quite young, for his outstanding pioneer work in electrocardiography. It recounts the scientific career of Lewis, together with accounts of his hospital work and teaching, and his family life and hobbies. There are over 100 illustrations including Lewis and his co-workers, and much of the information about Lewis has been derived from first hand accounts by his former associates. This biography appeal to cardiologists and to those physicians, surgeons and research workers with a special interest in the skin, pain and vascular disease, as well as clinical physiologists and medical historians.
