Studies in LSP in Colombia began in the 1990's, mainly in the discipline of terminology. Since then, studies in translation, terminology, and LSP have spread out throughout the country. Many papers have been written since then in national and international journals by Colombian authors. This book comprises a set of 20 chapters derived from M.A. and Ph.D. theses of Colombian authors written in Austria, Chile, Colombia, France, Norway, and Spain. The multidisciplinary view of this book includes scholars from translation, linguistics, computer engineering, philosophy, and library and information science. These chapters deal with linguistic, phraseological, terminological, didactic, and textual issues related to terminology, translation, corpus linguistics, and computational linguistics from the Universidad de Antioquia, Universidad de Medellin, Universidad Nacional de Medellin, Universidad Autonoma de Manizales, Universidad EAFIT, Wake Forest University, NHH Norwegian School of Economics, Universite Grenoble Alpes, and Universite Paris VII."

This handbook gives an overview of language for special purposes (LSP) in scientific, professional and other contexts, with particular focus on teaching and training. It provides insights into research paradigms, theories and methods while also highlighting the practical use of LSPs in concrete discourse situations. The volume is transdisciplinary oriented with a firm basis in the language sciences, including terminology, knowledge transfer, multilingual and cross-cultural exchange.

Aiming at exemplifying the methodology of learner corpus profiling, this book describes salient features of Romanian Learner English. As a starting point, the volume offers a comprehensive presentation of the Romanian-English contrastive studies. Another innovative aspect of the book refers to the use of the first Romanian Corpus of Learner English, whose compilation is the object of a methodological discussion. In one of the main chapters, the book introduces the methodology of learner corpus profiling and compares it with existing approaches. The profiling approach is emphasised by corpus-based quantitative and qualitative investigations of Romanian Learner English. Part of the investigation is dedicated to the lexico-grammatical profiles of articles, prepositions and genitives. The frequency-based collocation analyses are integrated with error analyses and extended into error pattern samples. Furthermore, contrasting typical Romanian Learner English constructions with examples from the German and the Italian learner corpora opens the path to new contrastive interlanguage analyses.

Mit der Internationalisierung des Rechts hat sich der Bedarf an juristischen Übersetzungen deutlich erhöht und mit ihm auch die Ansprüche an Qualität und Rechtssicherheit. Diese kann der Übersetzer nur erfüllen, wenn Sachwissen, Terminologiekenntnisse und Vertrautsein mit den spezifischen kommunikativen und kognitiven Strategien die grundlegende Kompetenz für den Transfer zwischen Ausgangs- und Zielrechtsordnung bilden. Für die qualitativ sensible Schnittstelle zwischen Rechts- und Übersetzungswissenschaft bietet sich dieses Buch als geeignete Ausbildungsgrundlage an: Konsequenz vermittelt es das notwendige juristische Grundlagenwissen und führt von dort zu den Möglichkeiten des Übersetzens in andere Sprachen und Rechtssysteme. Hierzu greift die didaktisch angelegte und gut verständliche Darstellung stets auf vielfältige Textsorten und für die Berufspraxis repräsentative Texte als Übersetzungsübung zurück und bietet Verständnisfragen zur Selbstprüfung.

This book constitutes the refereed proceedings of the 13th Colombian Conference on Computing, CCC 2018, held in Cartagena, Colombia, in September 2018. The 46 revised full papers presented were carefully reviewed and selected from 194 submissions. The papers deal with the following topics: information and knowledge management, software engineering and IT architectures, educational informatics, intelligent systems and robotics, human-computer interaction, distributed systems and large-scale architectures, image processing, computer vision and multimedia, security of the information, formal methods, computational logic, and theory of computation.

Advances in Median Neuropathy Research and Treatment / 2012 Edition is a ScholarlyBrief™ that delivers timely, authoritative, comprehensive, and specialized information about Median Neuropathy in a concise format. The editors have built Advances in Median Neuropathy Research and Treatment / 2012 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Median Neuropathy in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Advances in Median Neuropathy Research and Treatment / 2012 Edition has been produced by the world’s leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at http://www.ScholarlyEditions.com/.

This book constitutes the refereed proceedings of the 17th Iberoamerican Congress on Pattern Recognition, CIARP 2012, held in Buenos Aires, Argentina, in September 2012. The 109 papers presented, among them two tutorials and four keynotes, were carefully reviewed and selected from various submissions. The papers are organized in topical sections on face and iris: detection and recognition; clustering; fuzzy methods; human actions and gestures; graphs; image processing and analysis; shape and texture; learning, mining and neural networks; medical images; robotics, stereo vision and real time; remote sensing; signal processing; speech and handwriting analysis; statistical pattern recognition; theoretical pattern recognition; and video analysis.

Plant Macronutrient Use Efficiency presents an up-to-date overview of the latest research on the molecular and genetic basis of macro-nutrient use efficiency (NUE) in plants, and strategies that can be used to improve NUE and nutrient-associated stress tolerance in crop plants. Plant NUE is a measure of how efficiently plants use available nutrients and an understanding of plant NUE has the potential to help improve the use of limited natural resources and to help achieve global food security. This book presents information important for the development of crop plants with improved macro-NUE, a prerequisite to reducing production costs, expanding crop production into noncompetitive marginal lands with low nutrient resources, and for helping to prevent environmental contamination. Plant Macronutrient Use Efficiency provides a comprehensive overview of the complex mechanisms regulating macro-NUE in crop plants, which is required if plant breeders are to develop modern crop varieties that are more resilient to nutrient-associated stress. Identification of genes responsible for macro-NUE and nutrient-related stress tolerance in crop plants will help us to understand the molecular mechanisms associated with the responses of crop plants to nutrient stress. This volume contains both fundamental and advanced information, and critical commentaries useful for those in all fields of plant science research. Provides details of molecular and genetic aspects of NUE in crop plants and model plant systems Presents information on major macronutrients, nutrient sensing and signaling, and the molecular and genomic issues associated with primary and secondary macronutrients Delivers information on how molecular genetic information associated with NUE can be used to develop plant breeding programs Includes contributions from world-leading plant nutrition research groups

This open access book explores the concept of Industry 4.0, which presents a considerable challenge for the production and service sectors. While digitization initiatives are usually integrated into the central corporate strategy of larger companies, smaller firms often have problems putting Industry 4.0 paradigms into practice. Small and medium-sized enterprises (SMEs) possess neither the human nor financial resources to systematically investigate the potential and risks of introducing Industry 4.0. Addressing this obstacle, the international team of authors focuses on the development of smart manufacturing concepts, logistics solutions and managerial models specifically for SMEs. Aiming to provide methodological frameworks and pilot solutions for SMEs during their digital transformation, this innovative and timely book will be of great use to scholars researching technology management, digitization and small business, as well as practitioners within manufacturing companies.
