Updated 2nd edition - The most comprehensive guide to the tropical Indo-Pacific nudibranchs and sea slugs available. Provides up-to date identifications of more than 2100 species.

Sometimes called the most colourful creatures on earth, nudibranchs are a type of shell-less marine snail that capture the attention of scuba divers, snorkelers and tidepool-gazers with their bizarre, ornate body forms and incandescent colouration. There are over 3,000 species worldwide and some of the most spectacular specimens are native to the temperate waters of the Pacific Northwest. A diver of many years' experience, Rick Harbo presents a brilliant guide to the most notable specimens found in local waters. This durable, water-resistant 8-fold pamphlet identifies more than 50 of the most common species from California to Alaska and is an ideal companion on visits to the sea as well as a beautiful addition to the

home library.

Nudibranchs are among the most beautiful creatures on the reef, with colors and shapes that dazzle and delight. Unlike fish that may disappear before our eyes in a flash, the showy nudibranchs glides slowly along the substrate, allowing us the time to savor this extraordinary sight. With their shell-less unprotected, bodies how do they survive in seas filled with hungry mouths? How do these sightless creatures navigate the reefs to find food and mates? What and how do they eat? How do they reproduce? What special relationships have they developed with other reef inhabitants? These and many more questions are answered in this informative and lavishly illustrated book. You will never look at a nudibranch the same way again.

Twenty three sultry sea slugs to color any way you like. Great for the science-minded/scuba-mate we all have. Matte-cover which can also be colored! Highly detailed and great for meditation and relaxation. Learn nudibranch identification the fun way with species reference pages-8.5"x 11" page size. Blank page in-between each illustration to reduce any possibility of marker bleed-through.
