~~Two trials of a new psoriasis treatment have given "hope" to sufferers, The Independent reported today. The newspaper said that the two separate studies show that a new drug – ustekinumab – is highly effective, has fewer side effects and is more convenient to take than existing treatments.~~

~~New treatment for psoriasis - NHS~~

~~Treating psoriasis There's no cure for psoriasis, but a range of treatments can improve symptoms and the appearance of skin patches. In most cases, the first treatment used will be a topical treatment, such as vitamin D analogues or topical corticosteroids. Topical treatments are creams and ointments applied to the skin.~~

~~Psoriasis - NHS~~

~~Emollients: Emollients are powerful moisturisers that are normally used in the treatment of dry, itchy skin conditions like psoriasis. There are a number of variants used to treat different types of skin conditions, however not all emollients are guaranteed to work, and some can even exaggerate your symptoms if your skin takes a reaction to them.~~

~~New Psoriasis Treatments and Medications 2020~~

~~Topical Treatments for Psoriasis Topical treatments are rubbed directly into the affected skin to bring local relief without the system-wide side effects of medicines taken by mouth or a shot....~~

~~Psoriasis Treatments: How To Get Rid of Psoriasis Quickly~~

~~In both psoriasis and psoriatic arthritis, disease flares may alternate with periods of remission. No cure for psoriatic arthritis exists, so the focus is on controlling symptoms and preventing damage to your joints. Without treatment, psoriatic arthritis may be disabling.~~

~~Psoriatic arthritis - Symptoms and causes - Mayo Clinic~~

~~Treatments for psoriasis can range from using topical lotions to oral medicines and prescription creams. Although oral medicines and oral treatments are effective, they are not as good as topical treatments. Topical remedies are applied directly to the affected area.~~

~~What is psoriasis - Common Causes, Symptoms, and Treatment~~

~~Treatment of psoriasis depends upon your individual circumstances. Treatment applied to the surface of your skin (topical treatment) is sufficient alone in most patients. For people with more extensive or difficult to treat psoriasis, ultraviolet light treatment (phototherapy), tablet treatment or injection treatment may be required.~~

~~Psoriasis - British Skin Foundation~~

~~Offering treatment with topical preparations such as emollients, corticosteroids, vitamin D analogues, coal tar, and short-contact dithranol (for large plaque psoriasis), depending on the person's preferences, cosmetic acceptability, and practical aspects of application.~~
