using Java. This text takes a logical approach to the presentation of core topics, moving step-by-step from the basics to more advanced material, with objects being introduced at the appropriate time. The book is divided into three parts: Part One covers the elements of the Java language and the fundamentals of programming. An introduction to object-oriented design is also included. Part Two introduces GUI (Graphical User Interface) programming using Swing. Part Three explores key aspects of Java's API (Application Programming Interface) library, including the Collections Framework and the concurrency API. Herb Schildt has written many successful programming books in Java, C++, C, and C#. His books have sold more than three million copies. Dale Skrien is a professor at Colby College with degrees from the University of Illinois-Champaign, the University of Washington, and St. Olaf College. He's also authored two books and is very active in SIGCSE.

(Piano Vocal). This sheet music features an arrangement for piano and voice with guitar chord frames, with the melody presented in the right hand of the piano part, as well as in the vocal line.

Interpersonal relationships are possible for humans because we are created in the image of a Trinitarian God. But if the Trinity is our model for relationships, why is the human condition rife with pain and evil? How are we to think correctly about fallen human relationships and our models for understanding them? Redeeming Sociology advocates a biblically informed model for human relationships—relationships rooted in the Trinitarian character of God, his governance of the world, and his redemption accomplished in Christ. Poythress examines how the breaking of relationships through sin leads to strife, murder, and oppression among human beings and sets cultures against one another. And he shows how these broken relationships are restored through the outworking of redemption in

Christ. Though typical sociological models for interpersonal relationships may offer some valuable insights, they are handicapped by a fundamental misunderstanding of humanity. The biblical model that Poythress presents correctly diagnoses the problem of human relationships, so it can likewise prescribe a biblical solution that infuses new meaning and power into how we relate to others made in the image of God.

This sequel to Graphics Gems (Academic Press, 1990), and Graphics Gems II (Academic Press, 1991) is a practical collection of computer graphics programming tools and techniques. Graphics Gems III contains a larger percentage of gems related to modeling and rendering, particularly lighting and shading. This new edition also covers image processing, numerical and programming techniques, modeling and transformations, 2D and 3D geometry and algorithms, ray tracing and radiosity, rendering, and more clever new tools and tricks for graphics programming. Volume III also includes a disk containing source codes for either the IBM or Mac versions featuring all code from Volumes I, II, and III. Author David Kirk lends his expertise to the Graphics Gems series in Volume III with his far-reaching knowledge of modeling and rendering, specifically focusing on the areas of lighting and shading. Volume III includes a disk containing source codes for both the IBM and Mac versions featuring all code from volumes I, II, and III. Graphics Gems I, II, and III are sourcebooks of ideas for
