History and development of public relations and politics in Malaysia.

Buku ini membentangkan tujuh bab dalam Bahasa Melayu yang mengetengahkan pengetahuan tempatan sebagai sumber maklumat utama untuk meningkatkan kelestarian kehidupan moden. Buku ini meneroka pelbagai aspek pengetahuan tempatan daripada segi penyertaan masyarakat tempatan dalam penyebaran maklumat, pertanian dan ekologi. Buku ini akan mengaplikasikan penggunaan sistem maklumat geografi (GIS) sebagai salah satu teknologi yang boleh membantu pihak berkuasa tempatan dalam menggubal keputusan yang lebih baik, memandangkan pihak berkuasa tempatan hari ini menghadapi cabaran permintaan pengurusan kemudahan yang lebih efektif, pengurusan alam sekitar yang lebih sensitif dan pelbagai peningkatan permintaan dalam isu pembangunan bandar. GIS membantu mengumpul, menganalisis dan mengintegrasikan pengetahuan tempatan dengan pengetahuan saintifik dalam proses membuat keputusan dan menyediakan penyelesaian dalam pengurusan bandar yang menggabungkan lokasi tertentu untuk membantu pihak berkuasa tempatan dalam membuat keputusan yang lebih baik.

Leadership is an essential skill for managers across the globe. It helps organisations achieve their goals by the effective management of people and other resources. This book contains some path-breaking studies in this field. It elucidates new techniques and their applications in a multidisciplinary approach. This book elucidates the concepts and innovative models around prospective developments with respect to leadership management. From theories to research to practical applications, cases studies related to all contemporary topics of relevance to this field have been included in this book. It is an essential guide for executives, business owners, managers and researchers in the field of management.

This book (based on the proceedings of the OECD Symposium "Government of the Future: Getting from Here to There") looks at the way public administrations have been reformed over the last two decades and draws lessons for a new generation of reform.

How do policy makers and managers square the circle of increasing demand and expectations for the delivery and quality of services against a backdrop of reduced public funding from government and philanthropists? Leaders, executives and managers are increasingly focusing on service operations improvement. In terms of research, public services are immature within the discipline of operations management, and existing knowledge is limited to government departments and large bureaucratic institutions. Drawing on a range of theory and frameworks, this book develops the research agenda, and knowledge and understanding in public service operations management, addressing the most pressing dilemmas faced by leaders, executives and operations managers in the public services environment. It offers a new empirical analysis of the impact of contextual factors, including the migration of planning systems founded on MRP/ERP and the adoption of industrial based improvement practices such as TQM, lean thinking and Six Sigma. This will be of interest to researchers, educators and advanced students in public management, service operations management, health service management and public policy studies.

'Oral and Maxillofacial Surgery' offers a concise et structured overview of current

maxillofacial practice, concerned with the diagnosis and surgical treatment of diseases affecting the mouth, jaws, face and neck. It is illustrated throughout with line diagrams et photographs to aid understanding of the procedures.
