Logistics and supply chain aren't the same things. Logistics is the management of the movement of goods whereas supply chain management covers the many other areas we're discussing here.

Logistics and Supply Chain Management

"Logistics typically refers to activities that occur within the boundaries of a single organization and Supply Chain refers to networks of companies that work together and coordinate their actions to deliver a product to market. Also, traditional logistics focuses its attention on activities such as procurement, distribution, maintenance, and inventory management. Supply Chain Management (SCM) acknowledges all of traditional logistics and also includes activities such as marketing, new ...

What is Logistics and Supply Chain Management?  
Because so many organizations make up a supply chain, the logistics involved in getting products and services into the hands of the consumer can be mindboggling. Known as the backbone of global trade, supply chain logistics is a network of transportation, warehousing, and inventory. Supply chain logistics executives must know how to choose the most advantageous mode of transportation, how to design and set up a warehousing facility, how to control and manage inventory and assets, and how to ...
